The (atmospheric) heat advection from the Atlantic
Ocean into the Central Arctic is discussed in connection
with changes in synoptic conditions. The phenomena
are illustrated with graphs based on observational data
gathered by scientific drifting stations in the polar
region and by permanent stations located on Spitzbergen

Determinations of glutamic-alanine transaminase ac-

the diagnosis of Botkin's disease. The determination of
glutamic-aspartic transaminase activity is less expedi-

alanine transaminase determinations in Botkin's disease
is reduced because positive results are often obtained
